

TECHNICAL DATA

D - FIX

EPDM BONDING ADHESIVE

DESCRIPTION

D FIX bonding adhesive is an adhesive, specially formed to bond all types of materials.

PROPERTIES

- Excellent bonding ability and permanent adhesion.
- Recommended for bonding of EPDM with variety of materials.
- Easy Application.
- Resistant to water and moisture.

USES

D FIX Bonding adhesive is used for bonding the EPDM membrane to other various materials and to it self.

APPLICATION

Before application the surface should be clean, free of dust, moisture and grease. D FIX is applied to the substrate with a brush or roller .After applying it should be allowed for approx. 10 minutes to bond the other material.

PACKING:

D-FIX is available in 20 Ltr. Metal pails.

COVERAGE

6 to 9 sqm/Ltr. On an even surface depending upon the substrate material and the type of application.

STORAGE

When stored in original, unopened container the average life is 10 to 14 months at 10 to 35° C.

SAFETY

Keep away from naked fire
