

TECHNICAL DATA

D FIX – 81-10

A /C DUCT ADHESIVE

DESCREPTION

81-10 is an adhesive, specially formed to bond all types of insulation material i.e. G.I Al, steel, asbestos sheets

PROPERTIES

- Excellent bonding ability and permanent adhesion.
- Recommended for bonding of variety of insulation materials.
- Easy Application.
- Off white in color
- Resistant to water and moisture.
- Highly Flammable.

USES

81-10 is used for bonding the insulation materials to other materials. And to it self. Its recommended on materials like rock wool, glass wool, polyurethane. Aluminum air conditioning ducts & heating ducts.

APPLICATION

Before application the surface should be clean, free of dust, moisture and grease. After applying it should be allowed for approx. 10 mins to bond the insulation. While applying there should not be any fire source near because of its flammable property.

PACKING : 81-10 is available in 20 Ltr. Metal pail.

COVERAGE 6 to 9 sq.m/Ltr. On an even surface.

STORAGE

When stored in original, unopened container the average life is 10 to 14 months at 10 to 35° C.
