

PERMABOND

ACRYLIC BONDING ADHESIVE

DESCRIPTION

Perma bond bonding adhesive is a floor covering adhesive, specially formed to bond all types of materials.

PROPERTIES

- Excellent bonding ability and permanent adhesion.
- Recommended for bonding of membranes / protection materials with variety of materials.
- Easy Application.

Resistant to water and moisture. Unique benefits of acrylic water-based adhesives

- Acrylic water-based technology provides high shear strength enabling immediate slitting and fast delivery.
- Shorter supply chain allows for greater flexibility and short production runs.

Health & Safety

Acrylic emulsions are FREE of organic solvents, VOCs and aromatic isocyanates which means:

- healthier food packaging,
- safer work environment,
- less fire hazard and less pollution.

Environment

- Environmentally friendly adhesive system.
- Planet-friendly technology as based on water - less dependency on oil feedstocks.

Easy to use

- Can be run in excess of 300 m/min dependent on air capacity of drying operation.
- Easy handling - delivered ready-to-use, no dilution necessary.
