

FELT-TS10

GEO TEXTILE

TS Geo textiles are mechanically bonded continuous filament non wovens from 100% UV stabilized polypropylene. They are characterized by a high resistance to installation damage, high water permeability and increased UV resistance.

SPECIFICATION

Type of product: mechanically bonded continuous filament nonwoven

Raw material: 100% polypropylene UV-stabilized

#	PROPERTIES	UNIT	VALUE
1	Puncture Resistance	N	1175
2	Tensile strength	KN/m	7.5
3	Elongation at max load	%	75
4	Thickness	mm	1
5	Mass	g/m ²	105
6	Water permeability	mm/s	130
7	Thickness	mm	1
8	Break through head	mm	1

PACKING

4Mwidth X300M length ROLL

Area:1200sq.m

weight of the roll:136kg

ORIGINE: EUROPE
